

Water for Wimmera Mallee Wetlands 2017-18

What do we want to achieve?

The Mallee Catchment Management Authority (CMA) intends to deliver water for the environment to a numbers of sites in 2018 -19 season. The water aims to improve the health of native plants and provide feeding and breeding habitat for many animals such as lace monitors, kangaroos, carpet python, turtles, water birds, Malleefowls, Major Mitchells, frogs and yabbies.

The Wimmera community are passionate about their local wetlands, using them for birdwatching, BBQs and fishing. If you are out at one of the sites receiving water for environment in 2018-19 we would love to see your photos or stories about the site, send to reception@malleecma.com.au

Healthy rivers are good for all of us.
